SUMMARY

Results-driven professional with over **4 years of experience across Healthcare, Cloud Services, and Operations Support**, specializing in data validation, data integrity, and process improvement. Skilled in analyzing complex datasets, identifying discrepancies, and collaborating with cross-functional teams to ensure accurate information and support data-driven business decisions.

WORK EXPERIENCE

Customer Operations Analyst — The Stevens Company

April 2026 - Present

- Processed daily orders via channels like email, phone and ERP system, inputting 80+ orders using AI-integrated systems.
- Prepared and managed proposals and quotations for orders valued at up to \$10,000, while ensuring customer satisfaction.
- Developed Customer Care and operations reports using Power BI to support performance monitoring and data-driven decision-making.
- Increased daily order-processing capacity from \$100K to \$140K by streamlining email-based order workflows, automating notifications and follow-ups, and reducing manual processing bottlenecks.

SDET — Akamai Technologies

Nov 2023 - Jan 2026

- Developed a status monitoring tool for CDN IP addresses, automating health checks and release status reporting, reducing manual verification effort by over 70% and earning team recognition for operational efficiency.
- Led the implementation of Green CI initiatives, maintaining pipeline health above 90% pass rate while executing automated test cases in parallel, improving release confidence and deployment speed.
- Designed and maintained Pytest automation frameworks for functional, regression, and end-to-end testing, ensuring high coverage of critical workflows.
- Documented findings, analyzed trends, and provided insights through daily reports to support process improvements.

Quality Assurance Engineer 2 — Zocdoc

Aug 2022 - Nov 2023

- Spearheaded QA for the Provider Onboarding team, establishing initial QA processes that accelerated onboarding of 50+ providers per month, directly supporting revenue growth.
- Developed the first automated revenue check workflow using Cypress, validating 10,000+ patient bookings per week and reducing manual verification effort by 80%; recognized as Rookie of the Quarter.
- Led QA activities across two teams (10+ members), performing API, functional, and end-to-end testing, identifying defects early, and ensuring seamless system integrations.
- Maintained detailed test plans, scripts, and traceability matrices, improving test coverage by 30% and supporting Agile delivery and team onboarding.
